BRUSH TECHNOLOGY FOR PARQUET PRODUCTION

COSMA
borstelfabriek holland

**BRUSH
TECHNOLOGY
FOR PARQUET
PRODUCTION**

▶ THE ADVANTAGES

- ✓ Highly recommended for spreading oil on wooden floorings and parquet
- ✓ Ideal for the treatment of parquet made of rough sawn, natural or distressed wood
- ✓ Excellent and better-looking finish
- ✓ **Deeper oil reach**, better oil penetration into the grain and even distribution => plank has an even finish all over with just **one-way through**

Traditional pads vs. Cosma padbrushes

COSMA

FOR PARQUET
PRODUCTION**

← **EASY**
→ **SWAP**

▶ **REDUCE OIL WASTE**

- ✓ No need for reverse roller to remove the excess oil => one-way through the Cosma padbrushes is more than sufficient to create an even finish
- ✓ The padbrushes absorb the correct amount of oil for the desired finish reducing unused oil excess

▶ **SUITS ANY MACHINE**

- ✓ Easy replacement of traditional pads. Try it or visit our test center in the Netherlands
- ✓ Includes bayonet fitting
- ✓ **Suits any machine**

PRODUCTION**

▶ **COST SAVING & SUSTAINABILITY**

- ✓ Re-use brushes over-and-over with the **Cosma Brush Cleaning unit**
- ✓ Eliminate the purchase of replacement pads
- ✓ Reduce the large amount of garbage waste caused by the used pads
- ✓ Padbrushes last up to **300 times** longer than traditional pads
- ✓ Less transport costs
- ✓ Padbrushes work also with **renewable natural fibers** from an agave plant whilst traditional pads are completely produced from synthetic material
